PROFESSIONAL SUMMARY

Entry-level Cybersecurity and Web Development professional with experience supporting digital systems, training users on software platforms, troubleshooting technical issues, and improving operational workflows. Recently completed the Google Cybersecurity Professional Certificate with hands-on exposure to Linux, Python, SQL, SIEM tools, IDS concepts, and network security fundamentals. Skilled in customer support, technical documentation, workflow optimization, and stakeholder communication. Adept at learning new technologies quickly and translating technical concepts for non-technical users.

TECHNICAL SKILLS

- **Google Cybersecurity Professional Certificate – Coursera / Google (2026)**
 - Completed training in Python, Linux, SQL, SIEM tools, IDS, risk management, and security operations.
- **Full-Stack Web Development – Udemy (In Progress)**
- **Full-Stack Web Development Training – ICT Training, Odi-Olowo/Ojuwoye LCDA (2024)**

CERTIFICATION

Cybersecurity: Security Fundamentals, Threat & Vulnerability Management, Network Security, Risk Management, Incident Response, SIEM Concepts, IDS/IPS Fundamentals

Programming & Tools: Python (Beginner), HTML, CSS, JavaScript, SQL, Linux, Git/GitHub, VS Code

Platforms & Software: Microsoft Excel, Word, PowerPoint, SharePoint, Trello, Asana, Jira, Monday.com, CMS Platforms

Other Skills: Technical Support, Software Training, Documentation, Troubleshooting, Team Collaboration, Customer Support, Workflow Optimization

WORK EXPERIENCE

June 2025 – Present

EMR Software Training Officer, Customer Relations & Quality Control

Clinify EMR Solutions

Lagos, Nigeria

- Trained healthcare personnel across multiple hospitals on EMR software usage, dashboard navigation, and digital workflow adoption.
- Simplified technical processes for non-technical users, significantly reducing onboarding and software adoption time.
- Collaborated with hospital management and IT teams to customize EMR workflows and improve operational efficiency.
- Provided remote technical support through Zoom, Google Meet, WhatsApp, and phone channels, resolving user issues and improving client satisfaction.
- Created user training videos and technical documentation using DaVinci Resolve and internal documentation tools.
- Conducted software demos and participated in sales meetings, contributing to stronger client retention and product adoption.
- Selected as one of the top trainers requested by the Lagos State Health Management Agency due to training effectiveness and communication skills.
- Documented user feedback, software issues, and workflow recommendations for continuous product improvement.

June 2024 – June 2025

Product Management Assistant – IT Office
LOVGRUB

Lagos, Nigeria

- Managed and updated 250+ daily product listings on the company's e-commerce platform with high data accuracy.
- Improved product categorization and metadata structure, contributing to increased product visibility and improved user navigation.
- Worked with technical and content teams to support real-time inventory updates and reduce stock-related customer complaints.
- Trained new team members on backend systems and digital workflows, reducing onboarding time by 50%.
- Gained hands-on experience with CMS platforms, backend administration, troubleshooting, and web content optimization.

January 2021 – February 2024

Administrative Intern / Secretary
KGR Limited

Lagos, Nigeria

- Managed customer inquiries, appointment scheduling, and operational coordination for 120+ clients.
- Drafted professional quotations, proposals, and business documents that contributed to improved client conversion rates.
- Coordinated communication between field technicians, management, and clients to reduce project delays and improve workflow efficiency.
- Maintained operational records, tracked budgets, and supported documentation processes with strong attention to detail.
- Participated in vendor and client meetings, strengthening communication and stakeholder management skills.

EDUCATION

2020 – 2026

BSc, Marine Biology – University of Lagos

PROJECT

Cybersecurity Labs & Hands-On Practice

- Practiced Linux command-line operations, SQL queries, and Python automation tasks through Google Cybersecurity labs.
- Worked on simulated cybersecurity scenarios involving threat detection, vulnerability management, and incident response workflows.
- Explored SIEM and IDS concepts for monitoring and identifying suspicious activities.

Web Development Learning Projects

- Built responsive front-end practice projects using HTML, CSS, and JavaScript.
- Used GitHub for version control and project hosting while learning modern web development workflows.

ADDITIONAL INFORMATION

- Comfortable working in fast-paced technical environments and collaborating with cross-functional teams.
- Strong written and verbal communication skills with experience supporting non-technical users.
- Actively building practical projects and expanding cybersecurity and web development expertise.
